

Warsaw, 17.09.2026

Results of the recruitment for PhD students position for projects:

We would like to inform you that recruitment for the above-mentioned projects has been completed:

1. PhD student position - Laboratory of Prokaryotic Gene Regulation (NCN/SONATA BIS):

For the position of PhD student for the NCN project entitled “Dynamics of RNA degrading complexes in bacteria” carried out as the Sonata Bis grant (2022/46/E/NZ1/00462) has been accepted Niharika Rai.

2. PhD student position - Laboratory of Prokaryotic Gene Regulation (NCN/OPUS):

For the position of PhD student for the NCN project entitled “RNA biology at the phage–bacteria interface” carried out as the Opus grant (2025/57/B/NZ1/03589) has been accepted Sebastian Machera

3. PhD student position - Laboratory of Protein Structure (NCN/OPUS)

The competition has not been resolved; recruitment will be announced again.

4. PhD student position - Laboratory of Cellular Proteostasis (NCN/SONATA BIS)

The competition has not been resolved; recruitment will be announced again.

5. PhD student position - Laboratory of Bioinformatics and Protein Engineering (NCN/OPUS)

For the position of PhD student for the NCN project entitled “Data-driven Methodology for Predicting, Explaining, and Understanding of RNA and Small Molecule Ligand Binding” carried out as the Opus grant (2025/59/B/NZ2/01768) has been accepted Maciej Orski-Hryc.
