

Warsaw, 06.02.2026

Results of the recruitment for PhD students position for projects:

We would like to inform that recruitment for the above-mentioned projects has been completed:

1. PhD student position in the Laboratory of Protein Structure:

The competition has not been resolved, recruitment will be announced again.

2. PhD student position in the Laboratory of Cellular Genomics:

For the position of PhD student for the NCN project entitled “Discovering the diversity and its drivers of novel lung dendritic cell subsets in asthma” carried out as the Opus LAP grant (2024/55/I/NZ6/02571) has been accepted Julia Sobieska.

3. PhD student position in the Laboratory of Prokaryotic Gene Regulation:

The competition has not been resolved, recruitment will be announced again.

4. Two PhD students positions in the Laboratory of Iron Homeostasis:

For the positions of two PhD students for the NCN project entitled “Identifying unique adaptive responses of red pulp macrophages to iron deficiency” carried out as the Sonata Bis grant (2020/38/E/NZ4/00511) has been accepted 1 PhD student Umm E Laila.

5. Two PhD students positions in the Laboratory of Molecular and Cellular Neurobiology:

For the positions of two PhD students for the NCN project entitled “Destabilization of neuronal morphology in chronic inflammation: molecular mechanisms and identification of potential therapeutic agents.” carried out as the Opus grant (2025/57/B/NZ5/03511) has been accepted 2 PhD students Ismaheel Adeniyi and Hemasri Kilaru.

6. Two PhD students position in the Laboratory of Prokaryotic Gene Regulation:

For the positions of two PhD students for the NCN project entitled “RNA biology at the phage–bacteria interface” carried out as the Opus grant (2025/57/B/NZ1/03589) has been accepted 1 PhD student Roshni Roshni.
